

RollMatic T Installation  
DIJ  
June 2021  
Final

### **The perfect match from Hörmann**

With the trend to match garage and entrance doors gaining in popularity, a recent installation by Hörmann shows just how easy it is. The property now features a smart RollMatic T roller garage door in Noir Sable 2100 and a contemporary style Thermo65 Steel entrance door in a Decograin Titan metallic finish, resulting in an ideal combination.

The RollMatic T garage door from Hörmann has been developed to specifically address the requirements of an increasingly competitive roller door market, whilst not compromising the high-quality standards expected from Europe's leading garage door manufacturer. Launched in September 2020, the RollMatic T has been designed to be quick and easy to fit. The door is supplied in two sturdy and easily transportable boxes containing, with pre-assembled and pre-drilled components reducing preparation time onsite.

Featuring a 77mm lath, RollMatic T is available as either internal or external roller options. It is available in heights from 1200 to 3100mm and widths from 1000mm to 5000mm, with doors up to 3000mm wide supplied with 75mm side guides and doors over 3000mm with 105mm guides.

A wired, opto sensor in the bottom seal comes as standard, stopping the door if there is an unexpected obstacle and operates to DIN EN 13241. Alternatively, a wireless version is available as an upgrade.

Hörmann's range of Thermo65 steel entrance doors not only offer good looks but also feature a 65mm door leaf, which provides exceptional thermal insulation, achieving U-values as low as 0.87 W/M<sub>2</sub>K. Impressive security is in-built with all doors equipped with a 5-point security lock, with RC2 security equipment available as an option.

An extensive selection of door designs incorporating stylish accessories offer the opportunity to create a unique and impressive entrance door. Whilst the recent introduction of a range of fittings in elegant Jet-black, mirror the latest trend for black fittings popular in both kitchens and bathrooms. The Thermo 65 black.edition provides both exterior and interior lever handles and matching stainless steel glazing frames which create a sleek, modern look.

Hörmann's preferred colour selections have been further expanded to include a choice of on-trend greys such as Dusty grey and Grey aluminium adding to the range of colours available, so being able to match garage and entrance doors is more straightforward than ever before.

Homeowner Jeff Gill comments, "Our house has been given a real facelift. The RollMatic T is a huge improvement to the old up-and-over garage door, and we were impressed with just how quick it was to install.

Our old PVC front door had seen better days, so it made sense to change it at the same time to match the garage door. Not only does it all look good, but we now have doors which add to the overall security and safety of our home, adding to our peace of mind."
