

Industrial Product Display - Coalville  
June 2023  
Final

### **Hörmann Industrial Doors, Loading Bays, and Lifts on show at UK Headquarters**

Hörmann UK have just completed the creation of a demonstration and display area at their Coalville headquarters which brings together key products from the company's industrial portfolio. Featuring specialist lifting products from FBS-Hörmann and Hörmann Transdek together with the Hörmann range of industrial doors and loading bay equipment, prospective specifiers, developers and logistics operators now have the chance to view the combined range under one roof and experience live demonstrations.

The industrial area of the Hörmann product showroom has undergone an update and now features two recently launched industrial doors, the TurboLux transparent high speed spiral door and the Series 60 high speed sectional door – the latter of which can also be seen installed and working in the goods inwards/despatch area of the warehouse. Also featured is the new DSS scissor dock shelter, a product which is unique to Hörmann in the market, together with both swing lip and telescopic lip dock levellers.

Offering a hands-on experience, a Vehicle to Ground (V2G) yard lift and a Universal dock lift from Hörmann Transdek together with a scissor lift from FBS-Hörmann have all been installed onsite and are available for live demonstrations. Installed within the main warehouse is a Transdek 1 tonne capacity mezzanine goods lift, which can be seen in regular use transferring equipment between the warehouse floor and the Hörmann product showroom.

The company's perimeter protection products are represented by two industrial sliding gates which have been installed at the busy entrances to the transport and stock yards and can be seen in full operational mode.
